

SUMMARY

Highly motivated and Detail-oriented Computer Science graduate holding a Bachelor of Technology with a strong foundation in web development, programming languages (C, Java, Python, JavaScript), and cloud technologies (AWS). Proficient in SQL databases and experienced in delivering efficient and effective software solutions. Proven ability to collaborate effectively in team-based environments and eager to contribute to innovative software development projects.

EDUCATION

Rajiv Gandhi University of Knowledge and Technologies, Srikakulam

Bachelor's Degree in Computer Science and Engineering (CSE)

2020 – 2024

CGPA - 8.2

SKILLS

- Proficient in web development, encompassing HTML, CSS, JavaScript and React
- Proficient in SQL for managing and querying relational databases
- Skilled in using AWS services for cloud-based applications
- Knowledge of machine learning algorithms and techniques
- Strong organizational and time-management skills
- Excellent teamwork and communication abilities
- Detail-oriented and able to handle multiple tasks simultaneously
- Ability to break down complex problems and find effective solutions

CERTIFICATIONS

- Amazon Web Services (AWS) Certified Cloud Practitioner by CareerNinja
- Training experience in Data Science with Python by APSSDC
- Fundamentals of Python for Beginners by Great Learning

EXPERIENCE

- Quick learner with a passion for technology and a desire to grow professionally.
- Demonstrated strong communication and interpersonal skills.
- Successfully adapted to new situations and challenges.
- Served as the Coordinator for department events, showcasing leadership and organizational abilities.

PROJECTS

Password Manager

- Developed a web-based password manager using React, Tailwind CSS, and JavaScript and implemented secure password storage and management features. Utilized Tailwind CSS for efficient and responsive UI design.

Foody Zone

- Foody Zone is a web application built using HTML, CSS, JavaScript (with potential for a React framework), designed to help users explore and discover delicious food options.

Line segmentation using Deep Learning

- Developed a deep learning model using Mask Rcn which the palm leaf manuscripts data into line segments. This model is likely effective at isolating text lines within these ancient documents, which can be valuable for tasks like transcription or analysis.
